

HYGIENIC MATTRESSES FROM SWEDEN

With  **Lentex**®

Järven Health Care

INFECTION CONTROL HYGIENIC NO STRIKETHROUGH ANTI-DECUBITUS

Whiter than white

Our unique surface layer Lentex's white colour makes it easy to quickly pick up on any contamination. This makes it easy to maintain basic hygiene routines. After all – there's a reason why doctors have white coats.

Simple to clean

All Lentex mattresses are quick and easy to clean – simply wipe the mattress with a soap-based cleaning agent. The mattress can be disinfected using an alcohol-based disinfectant, with surfactants, or with any similar agent. Lentex - quick, clean and fresh.

No seams or zips

With no seams or zips, there is less of a risk of fluids and bacteria reaching the foam interior of the mattress. Our Lentex mattresses have been approved for use during the treatment of dangerous diseases, such as MRSA.

air0 is a top quality hygiene mattress developed for the treatment of pressure ulcers up to and including category 4.

Check out our wide range of hygienic mattresses at:

www.jarven.se

No more strikethrough

The unique surface layer Lentex, which is laminated directly on the foam core is probably the only solution to avoid strikethrough. This means no more hidden contaminated mattress cores and additional covers.

Anti-decubitus

All Lentex mattresses follow the contours of your body so that you adapt to the mattress. This means you are lying nicely and comfortably, with a low risk of pressure ulcers.

Solid protection

Our unique surface layer Lentex is impervious to liquid and has a low vapour permeability. This means that our Lentex mattresses are a comfortable and hygienic choice for both patients and staff.

Total cost performance

Wiping with a soap- and alcohol based cleaning agent makes your mattress hygienic and fresh in the blink of an eye. This removes the need for washing and for additional covers.

A mattress for every need

We believe in choice. We have therefore ensured that we have a range to suit everyone. We have Lentex hygienic coverings in everything from baby mattresses to fire-retardant mattresses for extremely demanding conditions.
